

Racial Segregation and Black-White Longevity Disparities

Thelonious Goerz*

Draft date: 17 June 2025

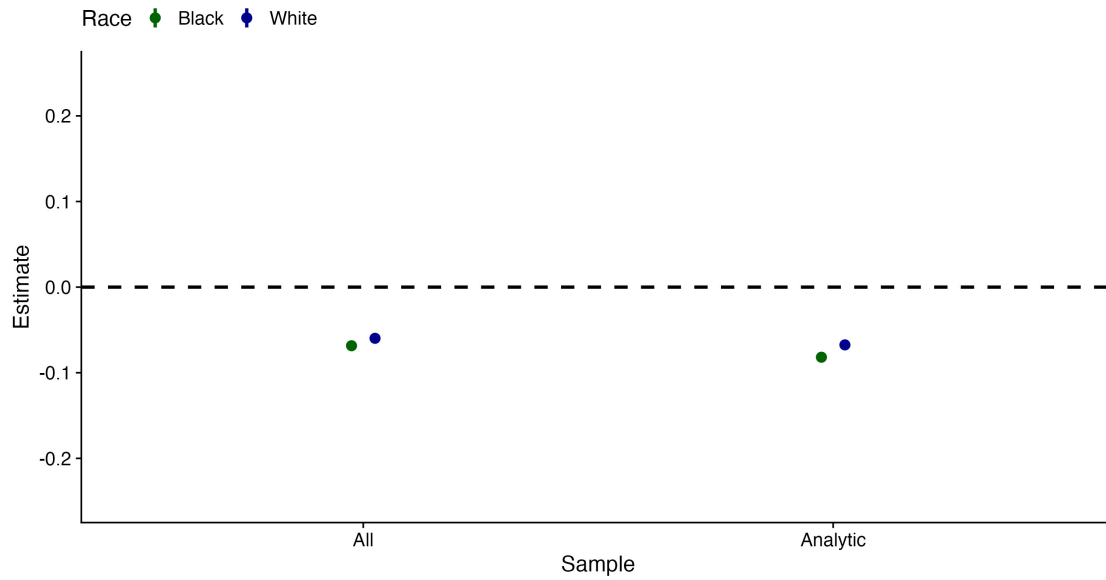

*Cornell University

Table 1: First Stage Regression of D on Instruments

	(1)
Ln(Number Governments)	7.45*** (0.29)
County Share Revenue from Federal Gov.	25.60*** (6.06)
Num.Obs.	4855
F	198.15

+ $p < 0.1$, * $p < 0.05$, ** $p < 0.01$, *** $p < 0.001$

First stage relationship includes death decade fixed effects and heteroskedasticity SEs.

Note: The All column refers to the association between segregation and longevity among all 20-35 years old Black and White Men and Women in the Numident sample and 1940 Census conditional on complete cases and inclusion in the geographic supplement. The Analytic sample is subsequently conditional on complete cases with coverage of the instrument.

Figure 1: Association Between Seg and Longevity by Sample

Sample V non-Sample Counties

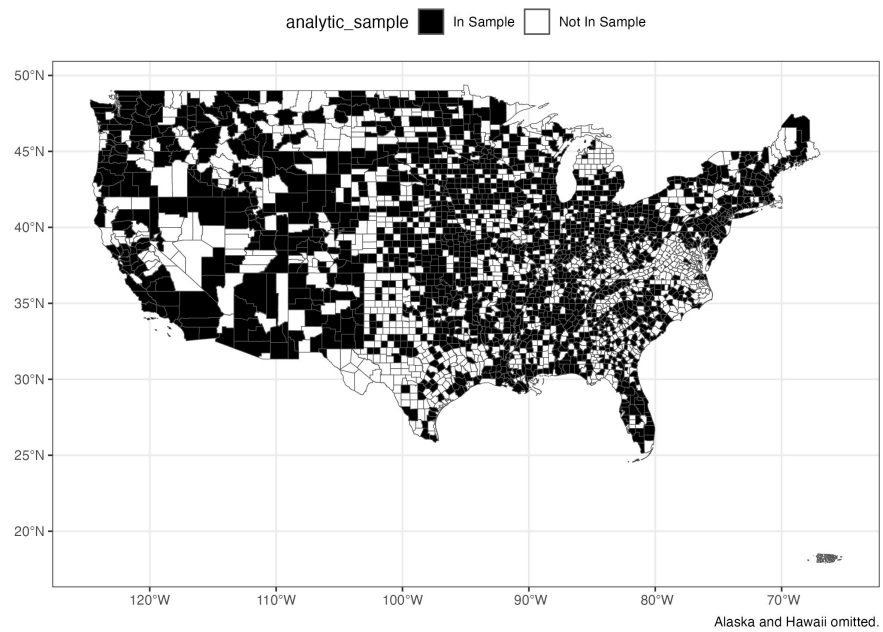

Figure 2: Sample vs. Non-Sample Counties

Table 2: Estimates of the Association Between Segregation and Longevity

	Black	Black + C	Black + C + Period	White	White + C	White + C + Period
